

Suman Sarkar

Fullstack Java Developer · Senior Associate Consultant

sumansarkarcob043@gmail.com | +91 7029711346 | +91 7602607017 | linkedin.com/in/suman-sarkar-024641191 | github.com/sumanCEH | Kolkata, India

Open to relocate – Bengaluru, Pune, Gurugram, Hyderabad, Mumbai, Kolkata

PROFESSIONAL SUMMARY

Senior Associate Consultant with 4 years of experience designing and developing scalable enterprise applications across the healthcare and automotive domains. Proficient in Java, Spring Boot, Microservices, REST APIs and Angular, with experience building full-stack and cloud-native applications. Skilled in production support, application monitoring, CI/CD and release management using Splunk, AppDynamics, Jenkins, uDeploy and Octopus Deploy, with a strong grounding in Agile methodologies, backend architecture and software engineering best practices.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript

Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate

Frontend: HTML, CSS, Angular

Databases: PostgreSQL, MongoDB

DevOps, Build & Monitoring Tools: Jenkins, Maven, Docker, Kubernetes, GitHub, GitHub Actions, CI/CD Pipelines, uDeploy

Cloud & Messaging: AWS (EC2, S3, Lambda), Microsoft Azure, IBM MQ, Kafka

Project & Collaboration Tools: Jira, ServiceNow, Confluence

Practices & Methodologies: Test-Driven Development, Design Patterns, Agile (Scrum), Microservices Architecture, Distributed Systems, OOP

Development & Testing Tools: Postman, SoapUI

AI & Productivity Tools: GitHub Copilot, OpenAI GPT, Claude

PROFESSIONAL EXPERIENCE

Senior Associate Consultant | Infosys

Nov 2024 – Present

Fortune 10 US healthcare client

- Won the Insta Award (2026) for a GitHub Copilot + Markdown solution that cut ticket delivery time by 40%.
- Developed and maintained microservices using Java, Spring Boot and REST for a large-scale healthcare platform serving enterprise clients.
- Resolved 16+ high-priority production incidents through root-cause analysis, log investigation and backend logic optimization, significantly improving system stability.
- Designed and implemented RESTful API enhancements following enterprise coding standards, improving service maintainability and integration reliability.
- Used Splunk and AppDynamics for proactive monitoring, performance tracking and anomaly detection to keep the application highly available.
- Managed and enhanced CI/CD pipelines using GitHub Actions, Jenkins, Maven, uDeploy and Octopus for reliable multi-environment deployments and controlled release cycles.
- Built a GitHub Actions agent in Python that auto-diffs master and QA branches for Java/Spring Boot methods and generates HTML comparison reports for QA sign-off.
- Conducted peer code reviews and mentored junior developers on Java, Spring Boot and clean coding principles.
- Leveraged GitHub Copilot, Claude and GPT to accelerate feature delivery, reduce debugging cycles and improve code quality.

- Built the CMR Training Portal from scratch.
- Designed and developed RESTful APIs across monolithic and microservice-based architectures using Java, Spring Boot, Hibernate and PostgreSQL.
- Developed responsive Angular frontend modules that integrate seamlessly with backend services across customer-facing automotive platforms.
- Optimized database interactions through query tuning, indexing and pagination to handle high-volume transactional data.
- Strengthened application security with Spring Security, using role-based access control and token-based authentication.
- Wrote unit and integration tests with JUnit and Mockito, improving reliability and ensuring high-quality releases across multiple environments.
- Contributed to CI/CD automation using Git, Jenkins, Maven and AWS-based deployments for stable multi-environment releases.
- Diagnosed and resolved production defects through log analysis and service-level debugging, improving reliability and reducing recurring issues.
- Took part in design discussions, sprint planning, stand-ups, retrospectives and peer code reviews, working closely with Product Owners, QA and cross-functional stakeholders.

- Completed intensive training across backend, frontend, databases, cloud and DevOps.
- Contributed to an internal employee management tool by implementing new features and fixing bugs, following Agile and Git-based workflows under senior developer guidance.

AWARDS & RECOGNITION

- **Insta Award 2026.** Infosys: recognised for a GitHub Copilot + Markdown solution that cut ticket delivery time by 40%.
- **Promotion to Senior Associate Consultant.** Promoted from Associate Consultant at Infosys for strong technical contributions, consistent performance and project impact.

CERTIFICATIONS

- Claude Certified Architect – Foundations (Anthropic)
- GitHub Copilot (GH-300)
- GitHub Foundations (GH-900)
- Microsoft Azure Fundamentals (AZ-900)
- AWS Technical Essentials (AWS)
- Certified Ethical Hacker (CEH v10)

EDUCATION

Master of Computer Applications (MCA) Techno International Newtown	2022
Bachelor of Computer Applications (BCA) Siliguri Institute of Technology	2020
